PROJECTS

Moviehub -Jan - Feb 2024

- Search Functionality: Implemented a search feature allowing users to search for movies by title.
- Movie Details: Displayed comprehensive movie details, including director, writer, actors, and duration.
- Trailer Viewing: Integrated trailers from TMDB API for users to watch trailers of selected movies.
- Responsive Design: Ensured the application is responsive and compatible with various screen sizes.
- Integrated TMDB API for fetching movie data and Optimize data fetching.

Live Code

Github User Search - Oct - Nov 2023

- Developed a web application using HTML, CSS, and JavaScript that enables users to search GitHub users and fetch details such as total stars earned, total repositories created, username, and profile photo.
- Implemented API integration to fetch data from the GitHub API and display it dynamically on the web application interface.
- Designed and implemented a responsive user interface to ensure optimal user experience across various devices and screen sizes.
- Utilized asynchronous programming techniques to optimize performance and ensure smooth data retrieval from the GitHub API.

Live Code
